

JARED MENARD

Systems Engineer | Software Developer | Data & AI Solutions

Turning complexity into clarity

Olympia, WA • (801) 814-8167

Professional Profile

Throughout my career I have been drawn to the same kinds of challenges regardless of industry: complex systems, unclear processes, and important decisions made with incomplete information. I specialize in learning unfamiliar domains quickly, building accurate mental models of how they work, and creating software, analytical systems, and automation that make those domains easier for other people to understand and use.

Over the past twenty years I have designed business intelligence platforms, reverse-engineered undocumented data models, developed forecasting systems, administered enterprise Salesforce environments, led high-performing teams, and partnered directly with executive leadership to improve decision-making. I enjoy building systems that transform complexity into clarity.

Selected Impact

- Designed and implemented an enterprise Power BI platform from the ground up, including SQL ETLs, executive dashboards, forecasting models, and statistically sound promotion analysis.
- Served as Salesforce Administrator and Business Intelligence Analyst for a 150-person AdTech sales organization while building reporting platforms in Python, SQL, VBA, and Google Apps Script.
- Created an original transcript-based coaching methodology that transformed team performance, became organization-wide training material, and contributed to earning Wayfair's Service Manager of the Year award.
- Reverse-engineered unfamiliar technical domains—from casino data schemas to military language analysis—without formal instruction, consistently delivering practical solutions.
- Built independent software systems including AI-assisted media tooling, developer tooling, automation, and simulation projects.

Professional Experience

Marketing Database Manager — Little Creek Casino & Resort (2024–Present)

Sales Analyst — Ecovacs Robotics Americas (2022–2023)

Business Intelligence Analyst / Sales Manager — MarketStar (2017–2022)

Service Team Manager / Data Analyst — Wayfair (2011–2017)

Account Manager — Interbank FX (2008–2011)

General Manager / Assistant Manager / Driver — Domino's Pizza (2004–2008)

Office Manager — B-5 Construction (2003–2004)

Cryptologic Linguist (Staff Sergeant) — United States Air Force (1997–2003)

Core Technologies

Python • SQL • Power BI • DAX • JavaScript • VBA • PostgreSQL • T-SQL • Salesforce • Azure •
Tableau • Machine Learning • ETL • Data Modeling • Forecasting • Git

Selected Independent Engineering

- Cinelingus — AI-assisted cinematic transformation platform.
- LODEX — Local AI coding assistant.
- Wingtip Studio — Independent software, games, simulation, and creative technology (wingtipstudio.com owner and sole dev).

Education & Professional Development

Associate of Science, Communications Technology — Community College of the Air Force
Airman Leadership School
Non-Commissioned Officer Academy
Full Stack Web Developer — DevPoint Labs / University of Utah
